

## Fiber Optic Adapter with Shutter

The fiber optic adapters with shutter are mainly available with LC and SC plastic version with or without flange. They are available in two versions, one is integrated build in type, the other is with removable shutter to meet flexible installation requirement, and avoid laser beam hurt.

We provide a comprehensive range of fiber optic adapters to meet your fiber service.

### Features

- Low insertion loss and stable performance
- Excellent temperature stability, wide operating and temperature range
- RoHS compliant, and 100% optical performance test.
- Various color are available
- With or without flange for option
- High precision with zirconia sleeve.

### Optical Specification:

Insertion loss(typical)	≤0.3dB
Interchangeability	≤ 0.2dB
Vibration	≤ 0.2dB
Repeatability	≤ 0.2dB
Durability	>1000 times
Operating temperature	-40~75°c
Storage temperature	-45~85°c
